IT340 Milestone 2 - Team Task Assignment (3 Members)

Member 1: Front-End & User Interface Lead

- Connect Login page to backend API
- Connect Register page to backend API
- Create form validation (required fields, email format, password rules)
- Display success and error messages
- Test user registration flow
- Test login flow
- Deploy and verify Front-End VM

Member 2: Back-End & Authentication Lead

- Create Express/Node.js backend
- Create authentication endpoints (/register and /login)
- Implement bcrypt password hashing
- Validate user input
- Prevent NoSQL injection attacks
- Implement session or JWT authentication
- Connect backend to database VM and deploy Backend VM

Member 3: Infrastructure, Database & Security Lead

- Deploy Database VM
- Configure MongoDB or MySQL
- Create Users collection/table
- Configure VLAN connectivity between VMs
- Configure UFW firewall rules
- Configure and verify basic system logs
- Maintain Trello board updates and deployment documentation

Final Team Testing (All Members)

- Register a new user
- Verify passwords are stored as hashes
- Login with valid credentials
- Verify invalid credentials fail
- Test basic injection protection
- Verify FE -> BE -> DB connectivity
- Verify firewall rules
- Take screenshots for presentation

- Update Trello and GitHub
- Prepare milestone demonstration
